

**FOUNDATION**  
COLORADO MESA UNIVERSITY

Dear WCCA,

I want to thank the WCCA for an amazing \$2,600 scholarship for the 2025-2026 academic year. It is such a great honor to receive this scholarship for my first year on the road to becoming an electrician. With your awesome generosity, this helps me progress closer ten times faster to reaching my goal of pursuing my career. This will help me be able to better focus on my schoolwork and more time studying. My point is that \$2,600 is a lot of hours of work to pay off so thank you very much for saving me on the time I needed to pay off for my tuition, books and fees.

I begin my second semester in the fall of 2025 on the first steps of becoming an electrician. Before I graduated high school, I was so overwhelmed and indecisive on what my next step should be in life. Then soon enough, I came to realize that the trades are something great to have. That's when I wanted to become an electrician. I have paid my time to visit the college campus along with the Tech campus, the CMU life, the professors and Patty Kempken the admissions counselor. CMU has been more than helpful to me and it truly makes me feel like I made the right choice in my career path. After I graduate with my associates degree in Construction Electrical, I plan on going back to my hometown in Pagosa Springs to start with the next chapter of my life!

Once again, thank you so much for your huge generosity and helping me get closer to my goal in getting my trade. You have helped me save a numerous amount of hours of labor on paying off the expenses. I can guarantee you that your generosity to me is not a waste. I will work hard for this. When I graduate and my career is on the roll, I plan on giving back and being generous with somebody else that is in need with a contribution, just as you have been with me.

Sincerely,

*Nathaniel Kinsley*
