Re: Disadvantaged Business Enterprise (DBE) Program - Interim Final Rule (IFR)

Dear Mr. Cater,

The Colorado Department of Transportation (CDOT) is in receipt of the United States Department of Transportation (USDOT) letter regarding the Disadvantaged Business Enterprise (DBE) Program - Interim Final Rule (IFR) which was posted to the USDOT DBE website on September 30, 2025.

On October 3, 2025, the USDOT published an IFR in the Federal Register modifying the eligibility requirements for participation in the DBE program. Furthermore, the IFR mandates that all currently certified DBEs be reevaluated, and ultimately recertified, for continued program eligibility under these new requirements. 49 C.F.R. § 26.111.

Until additional guidance regarding the IFR is provided, CDOT will take the following steps to conform to the direction of the IFR.

Federal Aid Contracts

- For CDOT contracts that have not yet been advertised, CDOT will not set any DBE goals on projects until guidance is received from USDOT regarding the Unified Certification Program (UCP) and the reevaluation process of existing certified DBEs.
- For CDOT contracts that are currently advertised for proposals or construction bid letting, CDOT will issue an addendum or revision to remove the DBE goals.
- For any CDOT advertisement where the proposal due date has passed or construction bids have been formally opened, CDOT will continue with execution of the awarded contract to avoid construction delays and will seek guidance from the Federal Highway Administration (FHWA) regarding enforcement.
- For all executed CDOT contracts, CDOT will continue to enforce the executed contract requirements pending further guidance from the FHWA.
- CDOT will communicate with local agencies to adhere to the above steps for federal aid pass-through local agency contracts.

COLORADO
Department of Transportation
Office of the Chief Engineer

Management of the CDOT DBE Program

- CDOT will work with its Colorado UCP partners to complete the reevaluation process as quickly as practicable in accordance with the IFR.
- CDOT will review new applications under the new certification standards as outlined in the IFR.
- CDOT will not respond to any appeals of DBE applications until further guidance is received from the USDOT.
- CDOT will continue to provide supportive services to the small business community.

We look forward to further guidance and direction on the Unified Certification Program (UCP) and DBE reevaluation process. Please let us know immediately if CDOT's current understanding of the IFR and CDOT's planned implementation as set forth in this letter is inconsistent with FHWA's understanding.

Sincerely,

Keith Stefanik, P.E.
