Technical Specifications for
Two (2) - 1/2 Ton Four (4) Door Crew Cab Short Bed Pickups

This specification describes the requirements for Two (2), 1/2-ton, four-wheel drive pickups. The units must be safe and efficient to operate and built strong and durable enough for heavy-duty operation over extended periods of time in a municipal setting. All standard equipment as shown in the manufacturer's printed literature must be included in the bid, plus any modifications to meet OSHA federal and state regulations in all respects. The units must be new and of the manufacturer's current model year in production at the time of delivery, and not a model to be phased out of production. It is stressed that what follows are minimum specifications and while they mention only the salient descriptive points of the unit, they do not exclude any major or minor items not specifically mentioned, but which would normally and reasonably be necessary for proper, safe, efficient, and beneficial use and ownership.

Bidding instructions:

- A. Each technical item of these specifications shall be individually annotated by the bidder in the first column provided on the sheet with one of the following statements:
 - 1. meets
 - 2. exceeds
 - 3. does not meet
 - 4. not applicable
- B. If any item is marked "exceeds", "does not meet", or "not applicable", details must be given in the second column provided, along with each entry describing what exactly is being bid.
- C. The individual cost of each item of the specifications must also be annotated if its cost has not been included in the basic bid price.
- D. Complete printed literature, publications, and photograph of the unit proposed must be included with each bid.

The vendor will please indicate the make, model, year, and type of pickup offered:
