

Gunnison County

Mag Chloride Quote Request

February 3, 2026

Gunnison County applies magnesium chloride to Gunnison County roads to curtail dust and minimize road maintenance. Gunnison County anticipates purchasing 250,000 to 300,000 gallons of product.

Gunnison County will:

- 1) Propose and coordinate the schedule for application. The schedule will attempt to maximize load quantities and minimize trips.
- 2) Prep the roads for chloride using a blade and water truck.
- 3) Provide necessary signing and traffic control.
- 4) Perform random on-site quality testing of the product. Minimum concentration levels of $MgCl_2$ shall be 27%. Any loads less than this level may be subject to rejection and/or reduced payment.

The Vendor will:

- 1) Complete the included Quote Form.
- 2) Provide equipment capable of spraying roads in one pass.
- 3) Supply proof of insurance (vehicular, liability and Workers Compensation coverage) per Colorado law.
- 4) Allow adequate time based on adopted schedule, for applications from May 1st – July 20th, weather permitting
- 5) Allow adequate time for late summer re-applications between August 15th – October 1st.
- 6) Have sufficient staff and equipment to apply up to 20,000 gallons per day in two different locations simultaneously.
- 7) Provide Gunnison County each day with a delivery sheet showing road number, gallons shot and application rate. Billing invoice must reference delivery receipt number.
- 8) Apply chloride with properly insured, licensed distributors with computerized spray systems which can provide documentation of rate of application, amount of chloride sprayed, and linear feet covered. Distributors must have a cab controlled extendable bar.

Sincerely,

Edward "Sparky" Casebolt
Operations Manager

Quote Form 2026

Company Name: _____

Representatives Name: _____

Phone Number: _____

Email Address: _____

A. Price per gallon for Gunnison County to haul mag chloride from vendors storage facility. This price **excludes** transportation, application and associated requirements. \$ _____
