**Bid No. 25-26-17
Cooperative Price Agreement for Fuel: Cardlock and Bulk Fuel Purchases**

ADDENDUM #1

April 15, 2026

CLARIFICATIONS TO THE PROPOSAL SPECIFICATIONS AS FOLLOWS:

- **Question:** As you might have heard, Bloomfield moved to a CAR LCFS program starting April 1, 2026, with the new Clean Transportation Fuel program. As a result, there is a new OPIS publication that is the CAR OPIS for states and or area participating in the LCFS program. I assume the bid is now based on the Bloomfield NM CAR OPIS publication.

- **Response:** Yes, we will change the bid language to read “price agreement fuel prices and billings to agencies during the term of the agreement, shall be the Bloomfield, New Mexico CAR LCFS OPIS price average.” Any other reference to Bloomfield, New Mexico OPIS in the bid document should read Bloomfield, New Mexico CAR LCFS OPIS price average.

The Below Answers are specific to San Juan County Departments only.

- **Question:** What is the expected frequency and volume of each delivery?
- **Response:** Both Departments order once a week. Public Works orders between 2000-3000 gallons of Clear Diesel and 500-800 Gallons of Regular Unleaded. Parks and Facilities orders 500-600 Gallons of Regular Unleaded and 300 Gallons of Red Dye Diesel.
- **Question:** Do the different locations order independently or together?
- **Response:** Independently
- **Question:** Can you provide the bid tabulations from the previous bid?
- **Response:** See Attachment
- **Question:** Are there any delivery vehicle restrictions for the locations?
- **Response:** No restrictions at either delivery location
- **Question:** What is the over/under to be considered for Transport vs Tank Wagon delivery? (+/- gallons?)
- **Response:** N/A
- As a reminder, all questions related to this procurement must be submitted in writing to Morgan.Thompson@sjcounty.net.

PLEASE ACKNOWLEDGE RECEIPT OF THIS ADDENDUM ON THE BID OFFEROR FORM.
